

QUICK GUIDE

How to Load a sound.

Move the cursor over the sound name. Press the X button to access the sample folders. Navigate to the desired sound sample. Press the X button to Load the sound.

How to Unload a sound.

Move the cursor over the sound name. Press the X button to access the sample folders. Press the Triangle button to unload the sound.

How to trigger a sound for sequencer playback.

Move the cursor over the pattern grid. Press the X button to activate a sound trigger on the current pattern step. Press the X button to make the sound playback in reverse (Sample playback mode).

How to record a sequence in real time.

While the sequencer is playing, press the Square button to lay down beats in real time.

How to preview a sound.

While the sequencer is stopped, move the cursor over the pattern grid. Press the Square button to preview the pattern sound.

How to select a parameter control.

The currently selected parameter is highlighted in red. To select a different parameter, click the Left or Right Trigger buttons. This will cycle through the parameters including tempo.

How to modify the parameter controls.

To modify any parameter control (including tempo) rotate the Analog stick in a clockwise or counter-clockwise direction. You will notice that the position of the Analog stick will match the position of the virtual knob.

How to fine tune the parameter controls.

Hold the Triangle button down and rotate the Analog stick in a clockwise or counter-clockwise direction. You will notice that the controls will move very slowly at 0.1% increments.

How to change the currently selected pattern.

Hold the triangle button and press Left or Right on the D-pad. You will notice that the transport timer at the bottom-center of the screen will highlight yellow. The pattern change will not take effect until you stop pressing the triangle button.

How to change Pattern Mode views.

Press and hold the Left or Right Trigger buttons to change the views. Available views are WAVE, TRACK, PATTERN and EFFECTS. An in-depth explanation of each view can be found in the users-manual.

How to enter Song Mode.

Press the Select button to enter Song Mode (by pressing the Select button from Song Mode).

How to write a song in Song Mode.

Song mode is designed to arrange the patterns in Pattern Mode into a song. See quick tips below.

How to activate a step in Song Mode.

Press the X button. This will activate the currently selected sound to playback on that sound step.

To activate all of the sounds on a step in Song Mode.

Press and hold the X button.

To erase a sound on a step in Song Mode.

Press the Circle button.

To erase all of sounds on a step in Song Mode.

Press and Hold the Circle button.

To change the volume of a sound on a step in Song Mode.

Rotate the Analog stick clockwise or counter-clockwise.

How to change the pattern on a step in Song Mode.

Press and hold the Square button. Then with the D-pad, press Left or Right to select pattern number.

How to enter Main Menu.

Press and hold the Select button to enter the options menu. You will be able to access these functions from there:

NEW, LOAD, SAVE, OPTIONS, EXIT

TIPS:

See the user's manual for in-depth explanation on all of the features of RHYTHM.
